International Society for the Study of
Subtle Energies and Energy Medicine

**ISSSEEM
BOARD OF DIRECTORS**
1994-95

President
Steven L. Fahrion, Ph.D.
*Life Sciences Institute of Mind-Body Health
Topeka, KS*

President Elect
Jerry E. Wesch, Ph.D.
*Howard Brown Health Center
Chicago, IL*

Directors
Elmer Green, Ph.D.
*Director Emeritus, Voluntary Controls Program
The Menninger Clinic, Topeka, KS*

Patricia L. Norris, Ph.D.
*Life Sciences Institute of Mind-Body Health
Topeka, KS*

Carol Schneider, Ph.D.
*Colorado Center for Biobehavioral Health
Boulder, CO*

T. M. Srinivasan, Ph.D.
*Gladys Taylor McGraw Medical Edn.
Scottsdale, AZ*

C. Penny Hierni
ISSSEEM, Greeley, CO

**THE INTERNATIONAL SOCIETY
FOR THE STUDY OF SUBTLE ENERGIES
& ENERGY MEDICINE**

The International Society for the Study of Subtle Energies and Energy Medicine (ISSSEEM), is an inter-disciplinary organization for the study of energetic and informational interactions. The Society is concerned with the study of informational systems and energies that interact with the human psyche and physiology, either enhancing or perturbing healthy homeostasis. The Society was organized in the fall of 1989.

Subtle Energies is designed to meet the needs of experimentalists, clinicians and theoreticians who pursue an interest in consciousness, and the dynamics and limits of human potential, by employing rigorous and ethical scientific methodologies and clinical procedures. It is explicitly inter-disciplinary to allow those with a deep understanding of one discipline to compare insights with those attained by others working along different paths. It is the hope of the leadership of the Society that through carefully prepared and edited publications the Society will stimulate ISSSEEM interest in the greater scientific community.

Membership dues sustain the Central office and provide members with quarterly newsletters and general mailings. The Society encourages the exchange of information through conferences, seminars, and workshops. The Fifth Annual Conference will be held in Boulder, Colorado, June 23-26, 1995. Program details are available from the Society's Central Office.

The International Society for the Study of Subtle Energies and Energy Medicine is a non-profit public benefit corporation based in Colorado. Editorial and Business Offices at: ISSSEEM Central Office, 356 Goldco Circle, Golden, CO 80403 • Headquarters and Business Telephone (303) 278-2228 • Business FAX (303) 279-3539 • Computer Address 74040.1273. Editorial Office Telephone (913) 271-8686 • Editorial Office FAX (913) 271-8698. All unsolicited manuscripts must be accompanied by a self-addressed stamped return envelope. Submissions must conform to parameters detailed at the end of the Journal. © 1994 by The International Society for the Study of Subtle Energies and Energy Medicine.

Cover Art

Paradigms or worldviews have been basic to human functioning ever since the dawn of history. These undergo changes from time to time as evidence and experience accumulates which cannot adequately be explained by the paradigm then in favor. The cover drawing of a series of "Russian dolls" shows how paradigms arising from scientific thinking have evolved to encompass larger and larger perspectives. The nesting of the Russian dolls illustrates that the paradigms that have previously demonstrated a high degree of success will be included within a new, more encompassing paradigm. The authors of the series of *Perspectives* concluded in this issue believe that evidence supporting the need for an expanded paradigm has grown to the point where mainstream science can no longer ignore its existence. The last "doll" in the series represents an undefined new paradigm, one which the authors believe will include the current science of separateness and encompass it into a science of connectiveness.
